# WirelessKable - USB-C Power and Audio / Video Converters

### USB-C to HDMI

USB type C to HDMI Converter  
With Power Distribution PD 3.0  
551-5607-001

### USB-C DC100FM

100W DC USB-C Power Converter  
Flange Mounted  
551-5117-001

### USB-C AC100

100W AC USB-C Power Converter  
551-5307-001 – Mode 1  
551-5307-003 – Mode 3

### USB-C Faceplate

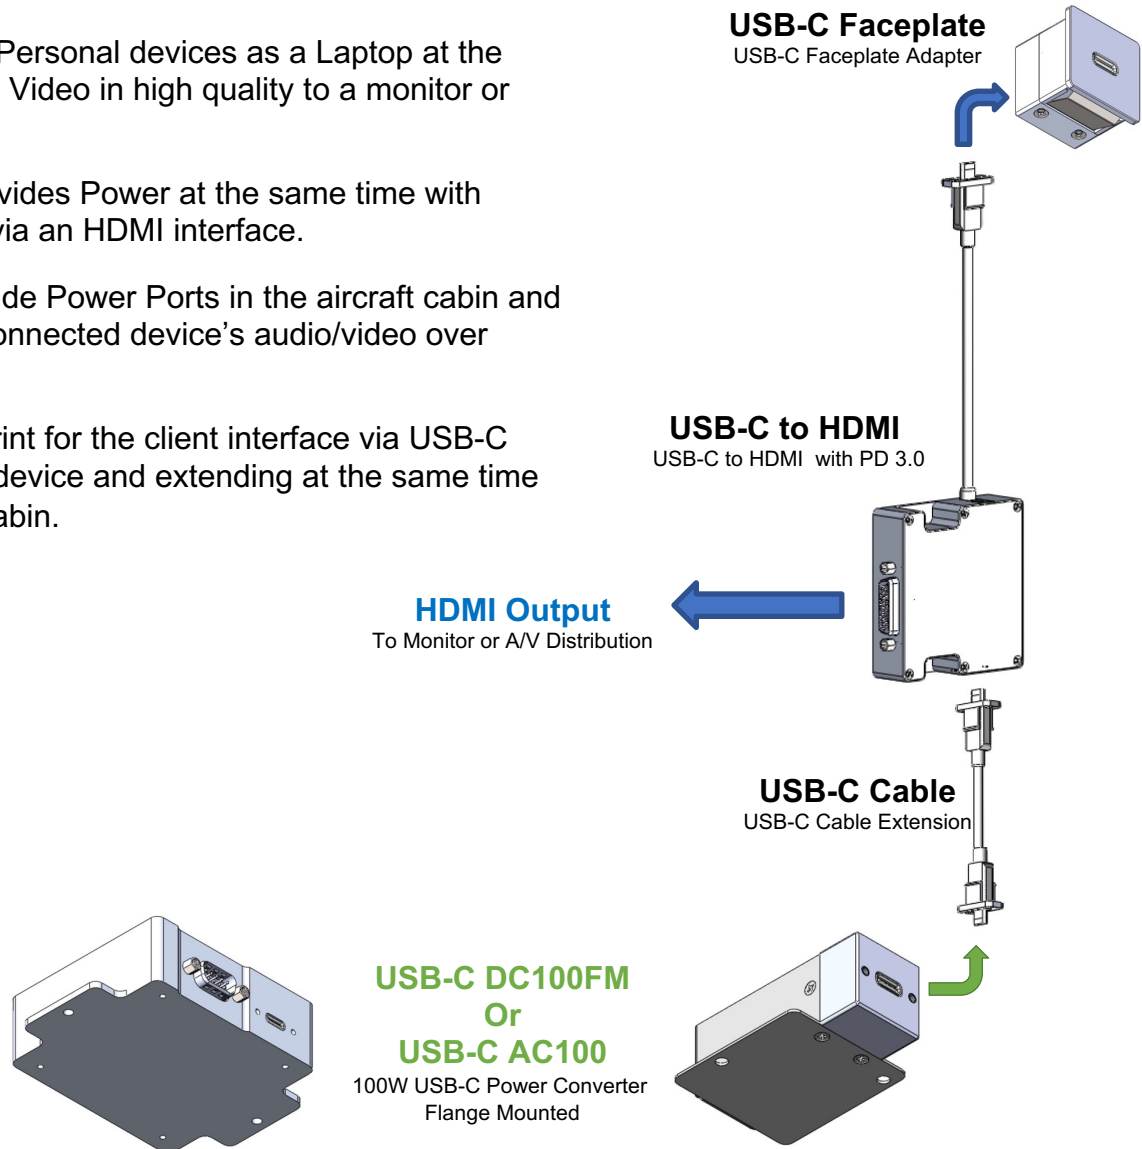

Used to expose USC-C connection  
for USB-C Converters  
551-5507-001

### USB-C Cable

USB-C Cable 100W rated with Locking Screws  
551-5407-001

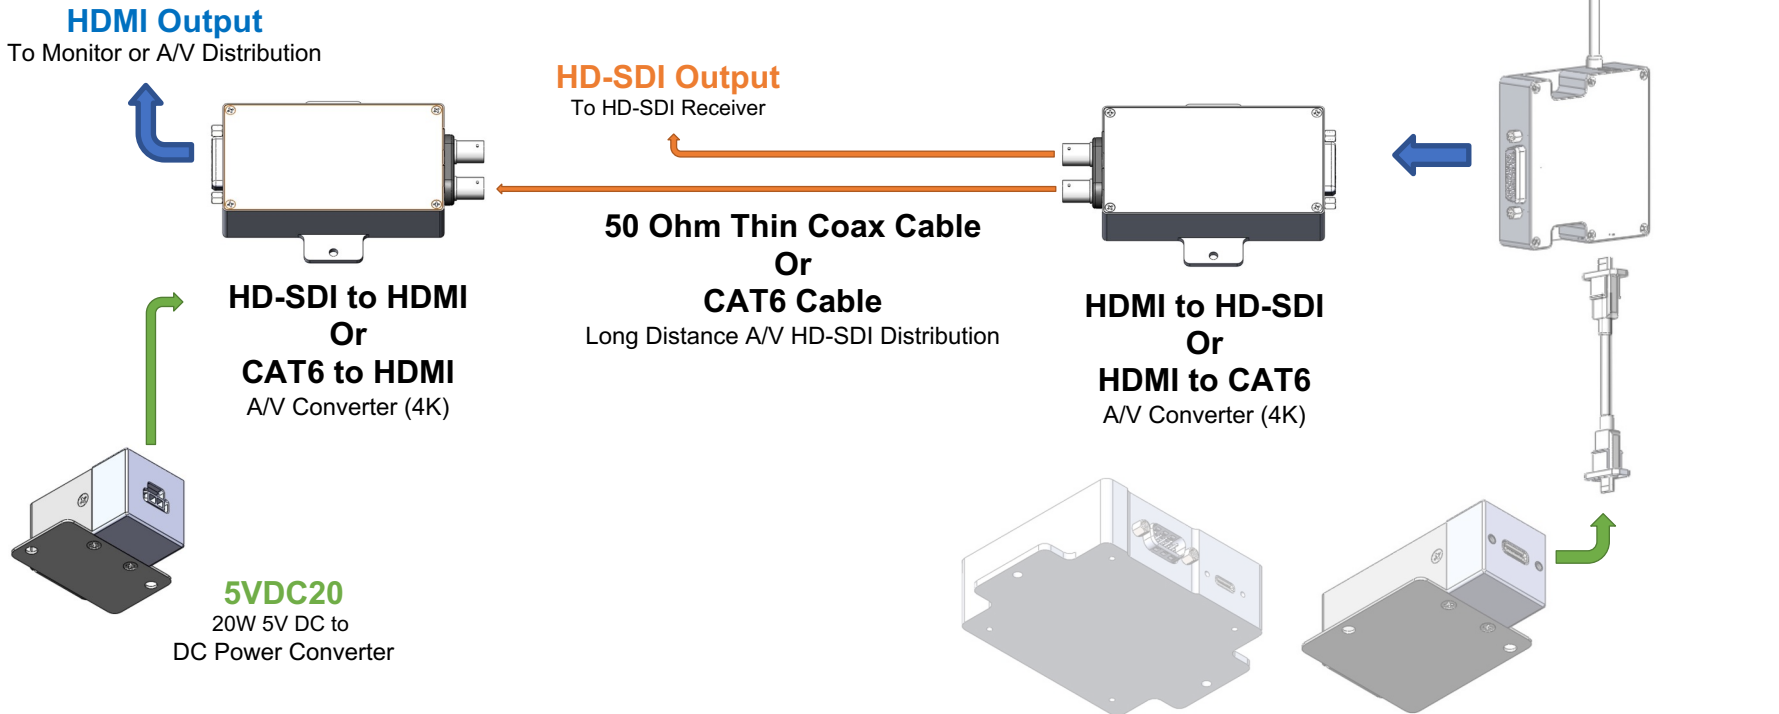

# WirelessKable - USB-C Video / Audio Solution

- The USB-C interface provides power to Personal devices as a Laptop at the same time as transmitting the Audio and Video in high quality to a monitor or source distribution equipment.
- Our line of Audio / Video Converters provides Power at the same time with streaming Audio and Video in real-time via an HDMI interface.
- The most common application is to provide Power Ports in the aircraft cabin and connect with the possibility to cast the connected device's audio/video over HDMI to a monitor.
- Our solution provides a very small footprint for the client interface via USB-C Faceplate, while powering the personal device and extending at the same time the video capability to a screen on the cabin.

# WirelessKable - USB-C Video / Audio Solution

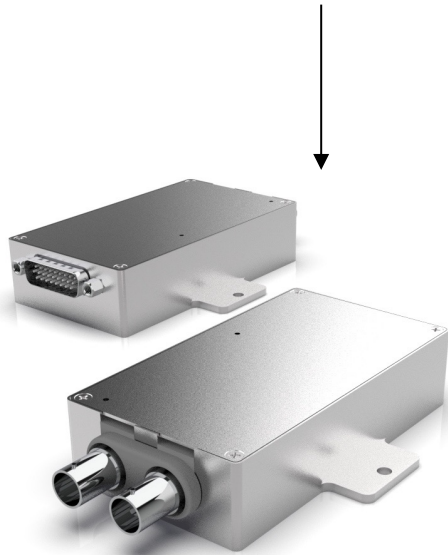

- The HDMI interface can NOT be extended over more than 10 feet. Even less in the aerospace noise environment.
- Therefore we offer a series of audio/video converters to transport the HDMI signal over long distances using a standard cable such as coaxial or CAT6.
- The HDMI signal is extended with NO degradation.
- Routing the extension cable is very simple.
- The interface is compatible in between our products, such as USB-C to HDMI and HDM to SDI converters.

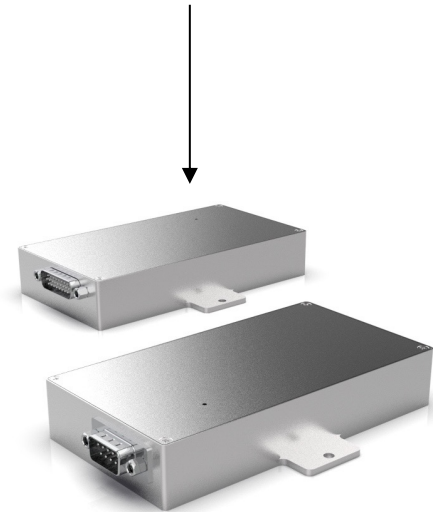

# WirelessKable - Other Audio / Video Converters and accessories
